

Descend Via-An Overview of STARs

While your arrival chart looks and functions just like your departure and enroute charts, arrivals have unique challenges that are not to be overlooked. Transition, vertical navigation planning, communication, and other increases in cockpit workload mean that you need to be reading arrival charts, not deciphering them. In An Overview of STARs, our chart professionals will show you how to use your charts more effectively in your transition from enroute to arrival and, ultimately, set you up for a successful approach and landing. This is a LIVE encore presentation (including Q&A) of our popular 2014 webinar!

Directions: In addition to registering at faasafety.gov site, webinar attendees must also register at: <https://cc.readytalk.com/r/os0h4gl17po&eom>

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
